Prospective Graduate Students

Students with related backgrounds such as psychology, computer science, robotics, and neuroscience are encouraged to apply. Students must have taken courses in 1) Introductory Psychology and 2) Cognitive Psychology and 3) Research methods in Psychology. Programming and designing skills are strongly encouraged.

Prospective Undergraduate Research Assistants

Interested applicants should fill out an online application ([link](#)) then send a cover letter to snuhahnlab@gmail.com.

We always welcome intelligent, tech-savvy, attentive, and self-motivated students interested in topics like human-robot interaction, computational modeling of affect and emotions, affective science. Current undergraduates at the Seoul National University are invited to apply for Honors Thesis Projects or Individual Research Projects for Interdisciplinary Program in Brain-mind-behavior.

Each undergraduate research assistant is paired with a graduate student or staff member in the lab and receives one-on-one training in multifaceted research projects. You will help with data collection (both online and offline), recruitment of participants, stimulus design, literature review, maintenance of the lab, and other miscellaneous works. Experienced members will have opportunities to be involved in data collection, recruitment, and stimulus design. Anyone planning to pursue graduate school are encouraged to apply.

Interested summer research assistants and visiting students should also follow the above procedure. Please contact us via email for further questions.
